

### **Small Group Exercise (20 minutes)**

*Please join your small group. In your small group you will have an opportunity to share the results of that exercise with one another. Using draft guiding principles we developed earlier this morning, each small group is asked to identify the 5-10 most important criteria to use when mandating vaccines for childcare center and/or school entry. List each of the 5-10 criteria on individual sticky post-its. Only use a few words to describe each criterion.*

*Please note suggestions for changes to guiding principles on a separate sheet of paper.*

*When you are done with the small group exercise, you will be asked to place post its on big white board in front of the room.*
